

Making Energy Work for Alaska

Five Energy Recommendations for Today's Special Legislative Session

1. Strengthen PCE by adding more money and expanding eligibility requirements.
2. Buy down debt at rural utilities, and put a price cap on fuel purchased prospectively, and have the state pay costs in excess of the cap.
3. Increase support for bulk fuel purchasing, transportation and cooperative purchase agreements and for the Denali Commission bulk fuel storage program.
4. Provide a family fuel subsidy for short-term relief.
5. Increase investment in renewable/ alternative energy and conservation projects.
